

H1N1 (Swine Flu) is widespread. Vaccine will be available for H1N1 Flu at multiple locations in November and December.

H1N1 Mass Vaccination Clinics are being planned.

Doctors and Retail Pharmacies will be receiving H1N1 vaccine over the next few weeks. So far we received a very small amount of Nasal Spray vaccine, which was distributed to medical practices serving children. Health care workers and first responders will be the first to receive shots when sufficient supplies are available.

What's happening locally with

H1N1 Swine Flu

Public Health, working with your local medical providers, is getting the H1N1 flu vaccine out to people as quickly as possible. Mass community shot clinics sponsored by your local medical providers will be held in November and December. Dates will be advertised when known.
